

Beata Piwowar, Krzysztof Ochociński: Concept of new Railway Connection Between the Power Station Bełchatów and the New Brown-coal Deposit in Złoczew

There was performed an analysis of variations of the course of a new railway line from Bełchatów to Złoczew proposed by the Spatial Planning Office of the Łódzkie Voivodeship. For the selected variations technical analyses were performed with specification of a scope of works and estimated investment expenditures. There were also carried out financial and economic analyses and an analysis of possible financing sources.

Keywords: railway transport, railway line
